CREEP FEEDERS

The L-H creep feeders have become one of the most popular ways to boost calf weights, supplement poor forage, and help young cattle transition to grain feeds.

The goal of our creep feeders is to help calves reach their full genetic growth potential in a cost-effective way that keeps your feeding operation profitable and helps protect feed from the elements. With options of 90, 120, or 160 bushel capacity, these feeders are designed to maximize weight gains before weaning and marketing.

- > Our creep feeders can feed up to approximately 75 head of cattle
- > Heavy duty construction: 12 gauge steel feed trough with feed saver lip
- > Extra heavy, 7,000 lb. axle
- > Easy lock down - lock up large adjustable creep fences, with weather guard panels
- > Four leveling stands must be used during feeding
- > Easy ground opening full length lid
- > 2,000 lb. screw jack - raise and lower feeder only
- > Easy adjustable feed flow gates
- > Rear hitch and 16" tires

MODEL	CAPACITY	HEIGHT	WIDTH	LENGTH	WEIGHT	FENCE
99109	90 BUSHEL	7'6"	7'	6'	1,050 LBS	6' x 6' (6' TOTAL FEEDER)
99173	120 BUSHEL	7'6"	7'	6'	1,500 LBS	6' x 6' (12' TOTAL FEEDER)
99145	160 BUSHEL	7'6"	7'	8'	1,680 LBS	6' x 8' (16' TOTAL FEEDER)
